Dt :16/04/2019

To,

The Officers-in-Charge,
All AO(GE) offices
All PAO's/Area Account Office
Account Section (Local)

Sub: Connectivity issue regarding VPNoBB/WAN facility

Ref: 1. This office letter No. even dt. 16/04/18 & 08/08/18.

2. This office letter No. EDP/NC/48/2018-19/04 dt. 14/05/18

In this context, it is intimated that this office is pressing hard for restoration as well as utilization of WAN/VPNoBB connectivity for ensuring effective implementation of various projects running in DAD. In this regard, various correspondences has been received wherein it was revealed that in some offices connectivity was normal while in other cases connectivity could not be restored due to varied reasons. Further it was also observed that offices with normal connectivity are still adopting the conventional method and invariably forwarding the hard copies of punching medium (PM) to this office rather than uploading/processing of the same through New Compilation System (NCS). It is worth mentioning here that centralized processing of PM at this end is very cumbersome exercise and associated with following difficulties:-

1. Delay/Non-processing of PM due to late receipt.
2. Mentioning of incorrect or NIL voucher number/class on PM.
3. Forwarding of same voucher no. through different modes with different figures.

In order to overcome above obstacles and to ensure real-time adjustment, it is advised that all the offices with WAN connectivity may kindly generate .csv file of PM through "Project Vishwak"/ "Fincomp utility" and upload the same on daily basis on NCS, as per direction of the HQrs office. It is also advised that those offices where connectivity is not available but located in close proximity to DAD office with WAN connectivity may utilize their WAN connection to do the needful.

In the end, all the officer-in-charge are now requested to kindly intimate the current WAN/VPNoBB status as per annexure through return mail by **19/04/2019** positively so that necessary action may be taken to restore the same where required. Further those office's where WAN connectivity is available or can be accessed in nearby DAD office are advised to utilize the same for uploading of PM as well as downloading of sectional compilation/RDR through NCS portal.

GO(IT&S) has seen.
